<div>Description</div> <p>Hi,</p> <p>I am using TCPDF Advanced Table.</p> <p>I create a simple PDF with a header and footer. Its working good and I am able to view the PDF in browser (Chrome). I downloaded the PDF and unable to open it in Acrobat. I get an error as <i>"There was an error opening this document. The file is damaged and could not be repaired"</i></p> <p>Then I ran the example (tcpdf_table\example-table-2-overview.php) that you have given in the bundle. I get the same problem with this also. Able to see in browser but not able to ope in Acrobat reader.</p> <p>Then, this same example (Pdf example #2:) is hosted in your website (http://www.interpid.eu/tcpdf-table), exactly the same code, it works good. I am able to download it and open in Acrobat Reader.</p> <p>Instead of streaming to browser, I saved it in disk. Then also the same issue repeats.</p> <p>If your example <code>tcpdf_table\example-table-2-overview.php</code> works for me, then I can port it to my code. Do I need to make any changes to it?</p> <p>I have spent significant amount of time on this. Please help me.</p> <p>Regards, Joseph.</p>			

History

#1 - 12/20/2016 09:20 AM - Andrei Bintintan

- Status changed from New to In Progress
- Assignee set to Joseph Kulandai

This is strange, I can reproduce it. I will investigate.

#2 - 12/20/2016 09:49 AM - Andrei Bintintan

- File Screenshot_98.png added
- Status changed from In Progress to Feedback

Resolution: Please delete the `_putinfo()` function from the `classes/pdf.php` file.
This function is used by unit-tests, but it seems indeed to break the pdf. I'll review and release a fix.

Please let me know if it fixed your issue.

#3 - 12/20/2016 09:50 AM - Andrei Bintintan

Or replace it with:

```
protected function _putinfo()
{
    if ( defined( 'ENVIRONMENT' ) && 'test' == ENVIRONMENT ) {
        $this->file_id = '1234567890';
        $this->tcpdf_version = "1.0.0";
    }
}
```

```
return parent::_putinfo();  
}
```

#4 - 12/20/2016 10:48 AM - Andrei Bintintan

Changes released, please make an update. <http://www.interpid.eu/download>

#5 - 12/20/2016 10:48 AM - Andrei Bintintan
