

Php Pdf Add-ons - Defect #1951

Nested tags uses default style

11/03/2020 01:56 PM - Andrei Bintintan

Status:	Closed	Start date:	11/03/2020
Priority:	Normal	Due date:	
Assignee:	Andrei Bintintan	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
The following multicell code:			
<pre>\$s = "<p>The following is <s>Text Strikethrough</s> and <bi strike='.5'>Text Strikethrough</bi></p>"; \$multicell->multiCell(0, 5, \$s);</pre>			
delivers the attached pdf.			
Expected would be that the s tag which is not defined anywhere uses the "parent" tag settings			

History

#1 - 11/03/2020 02:23 PM - Andrei Bintintan

- Subject changed from *Undefined tag uses pdf defaults instead of parent tag* to *Nested tags uses default style*

#2 - 12/15/2020 10:05 AM - Andrei Bintintan

- Status changed from *New* to *Closed*

Fixed in 6.1.0. Closing
