Description

There are use-cases when we need to set the row height for a table fixed.
Currently this can be achieved by a combination of LINE_SIZE, PADDING_TOP, PADDING_BOTTOM combination

Proposed solution:
We add an optional HEIGHT parameter. Default value is '' which will work as in the current version. If specified the specified value will enforce the specified value as the "cell height"

History

#1 - 12/23/2020 03:08 PM - Andrei Bintintan

- Subject changed from Fixed row height for table to Fixed height for table cell

- Description updated

#2 - 02/02/2021 09:43 PM - Andrei Bintintan

- Status changed from New to Closed

Implemented. Rolled out.
