Target version:			
Description			
<p>Hi, I'm just looking at upgrading our TCPDF Adv Table from 5.4.4 to 6.2.1.</p> <p>I just copied over all the libraries and ran out reports and an error on getDefaultFontName() came whilst doing a SetStyle. Has something changed in this regard ?</p> <p>Firstly I noticed that maybe the parameters sequence had changed so I change that round and still get the error.</p> <p>Hope you can advise?</p> <p>Regards Jerry</p>

- Status changed from New to Feedback
- Assignee changed from Andrei Bintintan to Jerry Quinnell

Hi Jerry,

Yes, that changed into getDefaultFont which is defined in: MyPdf class.
When you update maybe you can merge the PdfExamples classes as well.

I hope this helps a bit.

#2 - 02/02/2021 02:24 PM - Jerry Quinnell

That works great thanks ...

#3 - 02/02/2021 09:42 PM - Andrei Bintintan

- Status changed from Feedback to Closed

You're welcome. Closing.
