Description			
Hello In a table is it possible to have a cell with different border color Currently we can just use for one cell row 'BORDER_COLOR' => [0, 92, 177] 'BORDER_TYPE' => 'LR',

You can specify the BORDER_COLOR and BORDER_SIZE for each cell.
Be aware that adjacent cells partially overlap the borders, depending on the border width.

```
for ($j = 1; $j < 5; $j++) {  
    $row = [];  
    $row[0]['TEXT'] = "Line $j Text 1"; //text for column 0  
    $row[1]['TEXT'] = "Line $j Text 2"; //text for column 1  
    $row[2]['TEXT'] = "Line $j Text 3"; //text for column 2  
    $row[2]['BORDER_COLOR'] = [120, 150, 0]  
    $row[2]['BORDER_SIZE'] = 1  
  
    //add the row  
    $table->addRow($row);  
}
```
