<b>Description</b>			
Hi,			
relative font size settings are not handled correctly. If you are using something like			
<code>@\$obj-&gt;setStyle(\$tag, \$family, \$style, \$size, \$color)@</code> with <code>@\$size@</code> set to <code>@'70%'</code> for example,			
the output font size is not scaled correctly (wrong reference). To fix this, I'd like to suggest a change in Multicell.php (Line 374):			
Before:			
<code>@style[ 'size' ] = \$this-&gt;oPdf-&gt;FontSize * ( (float)\$style[ 'size' ] ) / 100 ;@</code>			
After:			
<code>@\$style[ 'size' ] = \$this-&gt;oPdf-&gt;FontSizePt * ( (float)\$style[ 'size' ] ) / 100 ;@</code>			
Regards, André
